

Collection CODE

It is a bookcase/container which alternates doors and open shelving units.

The idea behind this product is to alternate closed and open elements which can show and contain at the same time.

This apparently casual alternation creates an original optical effect that recalls the vertical lines of the bar code (from here the idea for the name of this collection).

The columns with doors can be fitted with shelves and/or drawers.

The open element characterized by a width of 140 cm allows a more effective use of Code in the living area for HI/FI and TV.

design: Duccio Grassi

Finish:
